

- 1st Hint-

Let's look for the coral scaffold created by our company in the aquarium of Innoqua, Inc. at the Kansai University "Reborn Challenge" (exhibited from August 5 to 11) in the Osaka Health Care Pavilion of Expo 2025 Osaka-Kansai Japan!

- 2nd Hint -

With the theme of a rich natural environment, we are conducting research and development on minimally invasive propagation methods for corals in collaboration with Kansai University.

• Picture shown are for illustrative purposes only. Actual exhibits may vary.

HI-LEX's SDGs: In response to the SDGs (Sustainable Development Goals), HI-LEX will operate as an environmentally friendly company, including being carbon neutral, and contribute to creating a society that respects precious lives and smiles.
